Claudia Baz Alvarez linkedin.com/in/claudia-baz-2a66b7180 | claualc
Double Degree in Telecom Engineering

Master of Science in Telecom Engineering, M.Sc. Politecnico di Milano
Bachelor in Electrical Engineering Escola Politécnica da Universidade de São Paulo (USP)

Experience

Network Engineer at Uber
1 year and 4 months – Present | *Amsterdam Headquarters*

- Led multiregion global scale network automation with Ansible accross datacenters (DCs) and enterprise campuses (multi site)
- Ansible playbooks to enforce L2 and L3 network configurations: BGP, OSPF, IPv4, DHCP, STP, VLANs, TACACS, RADIUS, access lists (ACLs), VTY lines, interfaces, access switchports, and trunk settings.
- Work with severalnetwork vendors Cisco, Juniper, Arista, Opengear Consoles, and Cisco Meraki (SDN/cloud)
- Cut global daily network automation enforcement time to one fourth (25%).
- Software Infrastructure stack: Ansible, Python, Prometheus, Grafana, Kubernetes, GitOps, GitHub Actions, Docker, Python, Puppet and ThousandEyes; DCIM tools including NetBox; ServiceNow.

  Co-author in article: Uber Engineering on network automation with Ansible:

Java Backend Developer Startup Mobiauto
9 months | *São Paulo, Brazil*

- Main backend developer of user side of the Spring Boot backend
- SQL scripting and manipulation of ElasticSearch and PostgreSQL Databases

Tech Lead, Fullstack Mobile Project University Programming Group
1 year | *São Paulo, Brazil*

- Responsible for the quality and technical guidance of a team of 4 developers
- Development of Backend of Python Djanco REST API, later deployed in Digital Ocean Linux server
- Development of Frontend of Javascript React Native mobile application
- Use third party APIs: Firebase for Authentication and Push Notifications
- Database (PostgreSQL) management

Education

Master's Thesis 5G network automation project for a localization system

- Modication of RRC layer in gNB (5G New Radio Base Station) RAN
- Python xApp in RIC controller of OAI (Open Air Interface)
- Triagulation algorithm based on SRS (Sounding Reference Signal)cross-correlation
- Docker virtualization, Linux, Redis cache, and Bash scripting

Automatic deployment of Ethereum network Academic project

- Ansible playbooks to control the life-cycle of smart contracts
- TOSCA (Topology and Orchestration Specification for Cloud Applications) to model the blockchain network
- Solidity, Python, and JavaScript
- Comparison between declarative tools and traditional scripting

SDN (Software-Defined Networking) University Project

- Definition of network topology in ADVA Ensemble Orchestrator
- Configuration of Palo Alto firewall
- Routing rules in Ubuntu VNFs

Languages

Spanish (Native) | Portuguese (Native) | English (Fluent) | Italiano (Fluent)
Born in Madrid, Spain; spent much of my life in Brazil; later returned to Europe to complete a master's degree in Milan, Italy.
